

Debugging Report for Code Snippets

Snippet 1 Errors:

1. TypeError: 'Hello' + 1 - Cannot concatenate a string with an integer.
2. File Handling Issue: The file is opened but not properly closed.

Snippet 1 Fixes:

1. Convert the integer to a string before concatenation.
2. Ensure the file is properly closed after writing.

Snippet 2 Errors:

1. SyntaxError: Missing colon (:) at the end of the 'for' loop.
2. TypeError: sum(i) * 2 - 'i' is an individual element, but sum() expects an iterable.
3. Logical Error: The function should return a total sum rather than attempt to sum individual elements.

Snippet 2 Fixes:

1. Add a colon (:) after the 'for' loop.
2. Modify the function to calculate and print the total sum instead of summing individual elements.
